

## BPMS 7 Administrator Release Notes

**BPMS 7 Admin – Last Version:** 7.02z (Last Update: 22-Apr-2019)

**SQL Server Script – Last Version:** 7.02z (Last Update: 22-Apr-2019)

### BPMS 7 Admin version 7.02z

Date Updated: 22-Apr-2019

For SQL Server users, SQL Script Version Required is: 7.02z (22-Apr-2019) or newer

#### **Changes for BC Users to Import list of BCWWA Certified Testers**

The tester information exported from the BCWWA web site was changed in 2019. The tester address and company name are no longer included in the export file. This update is required to import the testers from BCWWA.

#### **New Option “Check if Device is Approved”**

A new option called check “Check if Device is Approved” was added to the Customize form under tab “Customer/Facility/Device”. Options are shown below. The default option is “For New Devices Only”.

Check if Device is Approved

For New Devices Only
Always
For New Devices Only
Never

### BPMS 7 Admin version 7.02x

Date Updated: 08-Jan-2019

For SQL Server users, SQL Script Version Required is: 7.02n (12-Mar-2018) or newer

#### **Fix Error Make, Model and Size not in list of approved devices**

If Approved Device is NULL value in Orientation, the application no longer checks orientation. Prior to this fix the application would display error message “Make, Model and Size not in list of approved devices”.

### BPMS 7 Admin version 7.02v

Date Updated: 26-Oct-2019

For SQL Server users, SQL Script Version Required is: 7.02n (12-Mar-2018) or newer

#### **Updated report ‘List of Installs By Property ID No with Last Test Information’**

Added two new columns to report 'List of Installs By Property ID No with Last Test Information'. The new columns are "Cert. number" (from the tester field) and "Test Kit Serial No".

## BPMS 7 Admin version 7.02n

Date Updated: 12-Mar-2018

SQL Script Version Required: 7.02n (12-Mar-2018) or newer

### Changes for Annual Reports for State of Washington (DOH)

The following reports were updated:

1. State of Washington High Hazard Facilities/Systems (Details)
2. State of Washington Part 3B: CCC for High Hazard Premises or Systems
3. State of Washington Part 3C: CCC for Medical Premises Served

In columns A, B, C, when counting the number of only backflow devices with premises isolation protection, an additional filter is applied to only include the ones where the Hazard Level of the backflow device is "High".

### Backflow Device Form - Comments Field Type changed

The comments field type changed from TEXT(255) to Memo (NTEXT for SQL Server).

### Facilities Form Error 'The Data has Changed' after Mailing Address Update
