

BPMS 5.05o now available!

BPMS version 5.05o

Date Updated: June 19, 2009

[Update to fix problem with ReadOnly account](#)

This updated fixes an error that would prevent the application from running with the ReadOnly user account.

BPMS version 5.05n

Date Updated: February 3, 2009

[Update Report "State of Washington Part 4A: Backflow Preventer Inventory and Testing Data"](#)

The following changes were made to the report "State of Washington Part 4A: Backflow Preventer Inventory and Testing Data" for the year 2008:

- 1) A new column called "*Preventers taken out of Service*" was added (2nd column from right).
- 2) The "*Installed In 2008 (New)*" section now includes new devices that replaced existing devices.

BPMS version 5.05m

Date Updated: February 2, 2009

[Fix Problem Preparing First Survey Letters from Reminder](#)

When preparing a first batch of *Survey Letters*, new survey records were not created if previous survey records existed, even if all requirements in the latest survey were met. Instead, the new letters were appended to the latest survey record. This update fixes the problem.

BPMS version 5.05l

Date Updated: January 29, 2009

[Test Month Added to Survey Letter Recipients](#)

When preparing *Survey Letters*, you click on the *View/Edit Recipients* button then click *Search*, you can now filter/sort by Test Month.

BPMS version 5.05k

Date Updated: January 25, 2009

[Route Merge Field Added to Test Letters](#)

The Route field was added to the list merge fields for Test Letters and Test Report forms. The Route field used can be found on the Facilities form (Additional Info. tab).

BPMS version 5.05i

Date Updated: December 12, 2008

[Test Letter for Active Testable Devices now Excludes Non Testable Devices](#)

When a Test Letter is sent to the Current Customer or Current Facility, a dialog prompts with two options to include devices. Prior to this update the second option, "All active testable devices" did not exclude Non Testable Devices.

BPMS version 5.05h

Date Updated: December 8, 2008

[Error Opening Mail Merge Document if other Word Document is Open](#)

This update fixes an error that would occur when BPMS opened a Microsoft Word Document if another Word Document was opened.

BPMS version 5.05g

Date Updated: June 9, 2008

[Option to Add Blank Line in Devices Due Mail Merge Field](#)

In test letters, the mail merge field "*DevicesDue*" now has an option to insert a blank line between the Facility Name/Address and the list of devices due for testing. By default a blank line will be inserted to be consistent with a change that was made several versions back. However, if you don't want that blank line, you can remove it by following these steps:

- 1) From the Switchboard, click on the CUSTOMIZE button | CUSTOMIZE TEST LETTERS | CUSTOMIZE LETTERS.
- 2) Uncheck option "*Insert a blank line between Facility Name/Address and its list of devices due*"

[Fix Problem Searching for Facilities using the "No of Devices" search field](#)

This update fixes a problem using the SEARCH button of the FACILITIES form using the "NO OF

DEVICES” search field. Prior to this update, searching based on this field did not work as expected because the calculated value needs to be re-evaluated every time it is used in a search.

BPMS version 5.05f

Date Updated: May 21, 2008

[Fix Mail Merge Problem for WordPerfect Users](#)

This update fixes a problem that could occur when preparing a Test Letter in WordPerfect. The error would occur only if the only document to prepare was a Test Report form.

BPMS version 5.05f

Date Updated: Apr 28, 2008

[Fix Display of Mailing Address in Installed Devices form](#)

This update fixes a problem that could occur in the display of *Mailing Address* information of the *Installed Devices* form. The problem occurred only on configurations where the “*Mailing Address*” option was set to “*All in one Field*” in the Customize section.

BPMS version 5.05d

Date Updated: Mar 29, 2008

[Added “PROPERTYID” Mail Merge Field to Tests/Repair Letters](#)

The list of Property ID mail merge file was added to both, Test and Repair letters.

[Error #4160 Bad File Name opening Mail Merge Documents](#)

This update provides assistance fixing “Error #4160 Bad File Name” that could occur on some servers using UNC path with Microsoft Word. This is a bug in Microsoft Word. If error #4160 occurs, BPMS now explains how to fix the problem.

BPMS version 5.05c

Date Updated: Mar 16, 2008

[Added “DEVICSDUE” Mail Merge Field to Facility Letters](#)

The list of devices due for testing is now available in Survey letters. The mail merge field is called DEVICSDUE. The format of the list is the same as Test Letters so you can copy the “List of Devices” style from a test letter such as “1stLetter.doc”.

BPMS version 5.05b

Date Updated: Mar 13, 2008

Added “Unit No” to Facility Address Mail Merge Fields

The Unit No was added to the FACADDRESS merge field for mail merge documents.

BPMS version 5.05

Date Updated: Jan 13, 2008

New Option “Testing Service provided by Water Agency or its Contractor”

A new checkbox field labeled “*Testing Service provided by Water Agency or its Contractor*” was added to the *Customers* form. However, the field will not be displayed unless it is enabled.

You should only use this field if you provide backflow testing as an optional service to your customers. If your organization or one of your contractors provides the testing service to customers, this field should be checked. For all other customers, leave it unchecked (the default).

To enable this option, form the *Switchboard* form then click on the CUSTOMIZE button then click on the CUSTOMERS/FACILITIES tab. Check off option “*Enable check box [Testing Service provided by Water Agency or its Contractor]*”. When this option is enabled, a separate first letter, titled “*Assemblies with First Letter Due (Testing Service Provided)*”, will be used to send first letters to customers using your testing service.

BPMS version 5.04z

Date Updated: Dec 25, 2007

New Option “Skip Test Letter if a Survey is due the same year”

A new option called “**Skip Test Letter if a Survey is due the same year**” was added to the CUSTOMIZE section. This option was added for agencies who want to send only a survey letter to a customer when both, a test letter and a survey letter, are due the same calendar year.

To access the option, from the *Switchboard* form click on the CUSTOMIZE button then click on the CUSTOMIZE TEST LETTERS button.

New Option to have separate Initial Surveys from Re-Surveys

A new option called “**Separate Initial Surveys from Subsequent Surveys (Re-Surveys)?**” was added to the CUSTOMIZE section. When this option is set, initial surveys (first time ever) and subsequent surveys (re-surveys) will appear as separate items in the *Reminder* form. Set this option to yes ONLY if you have a separate set of letters for Initial Surveys and another set of letters for Re-Surveys.

To access the option, from the *Switchboard* form click on the CUSTOMIZE button then click on the CUSTOMIZE SURVEY LETTERS button.

BPMS version 5.04y

Date Updated: Nov 18, 2007

[Added Device Type to DEVICESDUE Mail Merge Field in Test Letters](#)

You can now add the *Device Type* to the *DevicesDue* mail merge field of your test letters, providing that the Make, Model, Serial No and Size are appear as one column. If they appear as separate columns, BPMS will not allow you add this new column due to lack of space to fit all the columns. To add the new column, from the BPMS Switchboard, click on the CUSTOMIZE button then click on the CUSTOMIZE TEST LETTERS button then CUSTOMIZE LETTERS. Put a checkmark beside the "Device Type" column the click OK.

[New field "Assigned to Bylaw Enforcement" added to Facilities form](#)

This update adds a new field called "*Assigned to Bylaw Enforcement*" to the *Facilities* form (under the "*Additional Info*" tab).

BPMS version 5.04x

Date Updated: Oct 2, 2007

[Fix Problem with "Year To Date Test Summary"](#)

This update fixes a problem with the "Year to Date Test Summary" report that could occur for devices tested twice a year.

[Fix Error Preparing Test Letters using option "Recreate Letters Prepared"](#)

This update fixes an error that could occur when preparing Test Letters that could occur when the option was set to "Recreate Letters Prepared". The error message "*Error #3061. Too few parameters. Expected 1.*"

BPMS version 5.04w

Date Updated: Sep 3, 2007

[Fix Problem with "Year To Date Test Summary"](#)

This update fixes a problem with the "Year to Date Test Summary" report that could occur for devices tested twice a year.

BPMS version 5.04v

Date Updated: Jul 24, 2007

[Fix Problem with some Mail Merge Fields in 5th Survey Letter](#)

Prior to this update, if more then 4 survey letters were sent, the 5th letter didn't have any value in the following mail merge fields: DateLetter1, DateLetter2, DateLetter3 and DateLetter4.

BPMS version 5.04u

Date Updated: Jul 3, 2007

[New Report "List of Installs by Customer Name, Facility Name and Address"](#)

A new report called "List of Installs by Customer Name, Facility Name and Address" was added.

BPMS version 5.04t

Date Updated: Jun 28, 2007

[Fix Problem in List of Devices Due in Letters](#)

This update fixes a problem in the display of list of devices due mail merge fields that occurred if a device did not have a value in the Device Location field.

BPMS version 5.04s

Date Updated: Apr 13, 2007

[Special Mail Merge Field added to Test Letter Dialog Box](#)

A special field was added to the Print Options dialog box for test letters. This field can be used to enter a value that will be assigned to all records using the merge field called Special_Mail_Merge_Field.

BPMS version 5.04r

Date Updated: Apr 6, 2007

[Add Option to Split Make, Model, Size, Serial No in Tests Letters](#)

In Tests Letters the List of Devices mail merge field can now display the Make, Model, Size and Serial No in separate columns.

BPMS version 5.04q

Date Updated: Apr 2, 2007

[New "TestKits" Merge field added to Tester Letter](#)

A new mail merge field called "Test Kits" was added to mail merge letter "*Letter - Annual Letter to Testers (MS Word Mail Merge)*". The mail merge field will list test kits/gauges registered to a tester.

BPMS version 5.04p

Date Updated: Mar 28, 2007

New Lookup Tables: Facility Category and Facility Sub-Category

Two new lookup tables, "Facility Category" and "Facility Sub-Category" were added. These tables can be used in the "Facility Type" table.

BPMS version 5.04o

Date Updated: Mar 22, 2007

New Report for State of Washington ASR

Two new reports were added to help State of Washington users complete their Annual Summary Reports (ASR). The reports are called "State of Washington High Hazard Facilities/Systems (Summary)" (Part 3B of ASR) and "State of Washington High Hazard Medical Premises".

BPMS version 5.04n

Date Updated: Mar 19, 2007

New Report "List of Facilities by Hazard Level with Facility/Hazard Type"

A new report called "List of Facilities by Hazard Level with Facility/Hazard Type" was added.

BPMS version 5.04m

Date Updated: Mar 12, 2007

Attempt to fix Error "4160 Bad File Name" when opening Microsoft Word

This update is an attempt to fix error "4160 Bad File Name" that a few users have encountered when BPMS opens Microsoft Word.

BPMS version 5.04l

Date Updated: Mar 7, 2007

Fix Error "Invalid Use Of Null" in Report "Letter - First Letter to Customers"

This update fixed error "*Error #94 Invalid Use of NULL*" that could occur in the *Reports* form upon clicking on the report "*Letter - First Letter to Customers (MS Word Mail Merge)*". The error occurred only if in the *Customize* form, option "Start Reminding to Prepare First Letters" was left blank.

BPMS version 5.04k

Date Updated: Feb 17, 2007

Fix Error hiding Database Windows in Access 2007

This update fixes an error hiding database window that occurred on computers running Microsoft Access 2007.

BPMS version 5.04j

Date Updated: Feb 14, 2007

[Fix Error in form "Import List of Approved Devices"](#)

This update fixes an error in the form "Import List of Approved Devices" that could occur when importing list of approved devices.

BPMS version 5.04i

Date Updated: Feb 5, 2007

[Add Option to Import List of CSA Approved Devices \(for Canadian Users\)](#)

Canadian users can now download and import a list of CSA approved backflow prevention devices into the BPMS database. To import, open the Approved Devices form, then click the *Import List of Approved Devices* button.

BPMS version 5.04h

Date Updated: Feb 2, 2007

[Inspection fields added to Surveys/Inspections form](#)

Two new fields: "Date Inspected" and "Inspected By" were added to the Surveys form (under the *Addition Info* tab). The Surveys form was also renamed to "Surveys/Inspection".

BPMS version 5.04g

Date Updated: Jan 30, 2007

[New Report 'List of Facilities by Facility Name and Address'](#)

A new report called '*List of Facilities by Facility Name and Address*' was added.

BPMS version 5.04f

Date Updated: Jan 28, 2007

Date Updated: Sep 26, 2006

[Allow User to Delete Approved Devices](#)

This update fixes the problem where users would not always be able to delete a record in the Approved Devices form.

BPMS version 5.03v

Date Updated: Sep 6, 2006

[Column 'Meets All Requirements' Added to Survey Search](#)

This update added column 'Meets All Requirement' to the survey search and search results.

BPMS version 5.03u

Date Updated: July 17, 2006

[Fix Error Compating and Repairing Database](#)

This update fixes error "You can't Exit BPMS 5 Admin now" which could occur when running the "Compact and Repair Database" option from the *Tools* menu.

BPMS version 5.03t

Date Updated: July 6, 2006

[Fix Error Creating Survey Letters when List of Requirements is too Long](#)

This update fixes an error that occurred when preparing Survey Letters. The error message "Error #3188 - Could not update; currently locked by another user on this machine" would appear after choosing YES when prompted to confirm that letters where sent successfully. The error occurred only when preparing the first letter if the *List of Requirements* text box exceeded approximately 2,000 characters.

BPMS version 5.03s

Date Updated: June 24, 2006

[Add "Include in Distribution List" field to Testers form](#)

A new field labeled "Include in Distribution List" was added to the *Testers* form (*Additional Info* tab). By default, this new field will be checked. This field was added to allow active testers to be excluded from the "List of Testers..." reports. When preparing a report, the *Print Options* dialog box will have the *Distribution List* option checked by default.

[Fix Error in "Year To Date Test Summary" Report](#)

This update fixes a problem with the "Year to Date Test Summary" report. The report was not including active devices that had never been tested on the Test Due line item (first row).

BPMS version 5.03r

Date Updated: June 11, 2006

Survey Letters Displays Warning for Large Number of Letters

When preparing Survey Letters, upon clicking on the *Preview* or *Print* button, a warning message box will appear if more than 50 letters are being prepared. This message only applies if the *Include* option is set to "*All Active Facilities*". This warning is to prevent the user from unwillingly preparing survey letters to all facilities.

BPMS version 5.03q

Date Updated: May 22, 2006

New Reports were Added

The following reports were created:

- 1) List of Assemblies that failed their Final Test
- 2) Summary of Letters Sent
- 3) Summary Test Results Entered

Please note that the "*Summary of Letters Sent*" report will only provide information about letters sent after the application was updated.

BPMS version 5.03p

Date Updated: May 18, 2006

Fix Survey Date Missing from Survey Letters Prepared from Reminder

Prior to this update if a Survey Letter was prepared from the *Reminder*, the *Survey Date* would not appear in the letter.

BPMS version 5.03o

Date Updated: May 14, 2006

New field "Do Not Mail Letters" added to Customers form

A new field called "Do Not Mail Letters" was added to the Customers form. When this checkbox is checked, letters will not be prepared for that customer.

BPMS version 5.03n

Date Updated: April 19, 2006

"Unit No" added to list of search fields in Facilities form

The "Unit No" field is now available as a search field in the *Facilities* form.

BPMS version 5.03m

Date Updated: April 18, 2006

New Report: "Monthly Test Summary"

A new report called "Monthly Test Summary" was added. The summary report breaks down the test due, entered, failed final test/incomplete and outstanding tests by month.

BPMS version 5.03l

Date Updated: April 13, 2006

New Field "Custom Field 1" added to Customers form

A new field named "*Custom Field 1*" was added to the *Customers* form.

BPMS version 5.03k

Date Updated: April 9, 2006

New Report: "Year To Date Test Summary"

A new report called "Year to Date Test Summary" was added. The summary report breaks down the test due, completed and outstanding tests by month.

BPMS version 5.03j

Date Updated: April 3, 2006

Changes to Report "List of Assemblies Tested by Tester Company"

A new report option was added to this report to give the user the option to use the *Company Name* in the *Tester* record when the *Company Name* is missing from the *Test* record.

Mailing Address added to Selected Reports

The mailing address was added to three of the reports prefixed "List of Installs...".

Fix Error Preparing Second Repair Letter

This update fixes error message "*Too Few Parameters. Expected 2.*" that could occur when preparing a second repair letter.

BPMS version 5.03i

Date Updated: March 27, 2006

Fix Error Saving Facilities with Single Quote in Street Names

This update fixes a problem that could occur when saving a facility with a single quote in the

Street Name.

BPMS version 5.03h

Date Updated: March 23, 2006

[Fix Problem Preparing Repair Letter when Test Fails](#)

This update fixes a problem that could occur when a test fails and the user chooses to prepare a Repair Letter right away. In some cases the first test letter would come up instead of the first repair letter.

BPMS version 5.03g

Date Updated: March 22, 2006

[New Report 'List of Tests Entered by Facility Name/Address'](#)

A new report called '*List of Tests Entered by Facility Name/Address*' was added.

BPMS version 5.03f

Date Updated: March 16, 2006

[Fix Report “Summary of Implementation Activities During Year”](#)

This update corrects a discrepancy that could occur in report “*Summary of Implementation Activities during Year*”. If a device did not have any test history - such as non testable devices - it would not be included in the report.

[Change to report “List of Installation and Test History”](#)

The “*Unit*” column as added to the report “List of Installation and Test History”.

BPMS version 5.02x

Date Updated: January 17, 2006

[Fix Problem Customizing Test Letters](#)

This update is to fix error “Nothing to Print” that would periodically occur when customizing Test Letters.

BPMS version 5.02v

Date Updated: December 21, 2005

[Column “Last Test Date” added to Installed Devices search](#)

The column “*Last Test Date*” was added to the *Search* option of the “*Installed Devices*” form.

BPMS version 5.02t

Date Updated: November 29, 2005

[Add Field ‘Check No’ to Tests form](#)

Field ‘*Check No*’ was added to the *Tests* form.

BPMS version 5.02s

Date Updated: November 28, 2005

[Add Fields ‘Test Company Name’ and ‘Company Phone No’ to Tests form](#)

Two new fields, ‘*Tester Company Name*’ and ‘*Company Phone No*’ were added to the *Tests* form.

BPMS version 5.02r

Date Updated: November 23, 2005

[Fix Problem in Reminder where Survey Letters were not always Aggregated](#)

In the *Reminder* form, the same survey letter could appear on several rows instead of being consolidated into one.

BPMS version 5.02q

Date Updated: November 22, 2005

[New Report 'List of Facilities With New Or Removed Devices By Acct No'](#)

A new report titled '*List of Facilities With New Or Removed Devices By Acct No*' was added.

BPMS version 5.02p

Date Updated: November 21, 2005

[Fix Survey Letter Problem where not All Survey Letters were Created](#)

This update is a fix for a problem when preparing a batch of survey letters, such as a follow up letter (i.e. 2nd Letter). The problem was that upon preparing the letters and confirming that the letters were printed successfully, not all the letters were flagged as prepared.

[Mail Merge Field 'REBUILD DUE' Added to Test Report forms](#)

The mail merge field "REBUILD_DUE" was added to Test Report forms documents.

BPMS version 5.02o

Date Updated: November 13, 2005

[Changes to Print Options Test/Repair Letters](#)

When preparing Test or Repair letters, the Print Options dialog box has a button called "*View/Edit Recipients*". This option used to display Customer information. Following this update, assembly information and facility information is also included. This change was requested by several users to allow filtering on field such as *Next Test Due* and *Test Month*.

[Test Month mail merge field added to Facility Letters](#)

The *Test Month* field of the *Facilities* form is now available in Survey letters. The merge field is called *TestMonth*.

[Option 'Do Not Use Automation' added to Customize options](#)

The *General* tab of the *Customize* form has a new option called “*Do Not Use Automation*”. This option was added for a user who had problems opening mail merge documents. It is recommended to leave this option unchecked.

BPMS version 5.02n

Date Updated: November 3, 2005

[New Report ‘Summary of Assemblies by Customer’ Available](#)

A new report titled ‘Summary of Assemblies by Customer’ was added.

BPMS version 5.02m

Date Updated: October 20, 2005

[Fix Print/Export Window Showing No Records in Testers Search](#)

This update fixes a problem in the Testers Search Results screen where clicking on the Print/Export button would open a new window but no record would appear.

BPMS version 5.02l

Date Updated: October 12, 2005

[Check for Incomplete Entries when Preparing Letters to Testers](#)

When preparing the mail merge report “*Letter - Annual Letter to Tester*”, BPMS now displays a warning if some of the selected testers have incomplete information.

BPMS version 5.02k

Date Updated: October 3, 2005

[Fix Problem Calculating Next Survey Date](#)

This update fixes a problem in the *Surveys* form whereby when a survey met all the requirements, the *Next Survey Date* was not always calculated properly. Specifically, if the facility had the *Survey Cycle* set to <None>, the *Next Survey Date* was not cleared upon checking option *Meets All Requirements*.

BPMS version 5.02j

Date Updated: October 2, 2005

[Default Temporary Folder set to %AppData%](#)

The default temporary folder was replaced by %AppData%, which refers to the Application Data

folder for the local user. Previously, the default temporary folder was the folder where the application was installed. This could cause problems when preparing mail merge letters as some users did not have the rights to create files in the application folder.

BPMS version 5.02i

Date Updated: August 30, 2005

Property ID No now available ad Mail Merge field in Test Report Forms

The field *Property ID No* (*Facilities* form) is now available as a mail merge field in Test Report forms documents. The mail merge field is called *Prop_ID_No*.

BPMS version 5.02h

Date Updated: August 28, 2005

Field “WSSN” added to Facilities form

Field WSSN was added to Facilities form (under Additional Info tab). This field is also available as in all mail merge documents.

BPMS version 5.02h

Date Updated: August 25, 2005

Fields Test Cycle “<None>” replaced by “<Never>”

In the *Installed Devices* form the *Test Cycle* value “<None>” will now display “<Never>” meaning that the devices will never be due for test. This description is less confusing. Also, devices where the *Test Cycle* is set to “<Never>” will no longer appear in the *Reminder* to send test letters.

BPMS version 5.02f

Date Updated: August 20, 2005

Fields “Repair Date” and “Repaired By” added to Test Repair form

New fields “Repair Date” and “Repaired By” were added to Test Repair form.
